

# PLANT PROFILE & ROTATE CHECKER

FREE PRINTABLE PLANNERS

# *Tell me how*

---

I tried to organize my knowledge so that you get a product that will help you optimize your time and monitor health of your favorite plants.

You need a good and competent system, only then knowledge will work for you rather than against you. Now you can easily write down information about your plants and control the whole process.

With two simple steps, you can start incorporating plant information into your schedule so your time stays manageable, and you keep your sanity. Win-win.

**Plant Profile** - create a profile for every plant you have, record necessary information and how to take care for it, it'll help you to grow a healthy and strong plant.

**Rotate** - list your outdoors down and fill in the dates they should be harvested and replanted, you may use the page for replanting indoors either.

# *Like what you see?*

Here's what to do next...

Today, I'm excited to announce the release of my first Planning Kit:

[HOUSEPLANTS & GARDEN PLANNING KIT](#)

Check out [the full sales page](#) describing the Planning Kit, what you will get and how to get your exclusive **limited time subscriber discount!**

Cheers,  
Michael Bauer
